The Indian Institute of Geomagnetism (IIG) stands as a leading centre of excellence in the field of Geomagnetism and allied geophysical sciences, driving cutting-edge research that bridges the Earth's deep interior and the vastness of near-Earth space. At IIG, scientists delve into the dynamic processes shaping our planet, from electromagnetic imaging of the Earth's interior, crustal magnetic anomalies, and paleomagnetic and environmental studies, to petrological investigations, GPS-based crustal deformation, and groundwater research. Extending beyond the Earth's surface, IIG's research also probes the complex interactions of particles, fields, and currents in near-Earth space, with a special focus on space weather and its influence on our technological environment. With world-class infrastructure, a vibrant research ecosystem, and excellent career opportunities, the Indian Institute of Geomagnetism continues to inspire scientific discovery and innovation—unraveling the invisible forces that shape our planet and beyond.
